

Requesting an Exception to the Formulary

You can ask Network Health Insurance Corporation to make an exception to our coverage rules. Generally, we will only approve your request for an exception if alternative formulary drugs would not be as effective in treating your condition and would have a negative effect on your health. Contact us to ask for an initial coverage decision for a formulary, tier or utilization restriction (specific criteria) exception. When you're requesting an exception, please submit a statement from your physician supporting your request. For more detailed information about your Network Health Insurance Corporation prescription drug coverage, please review your Evidence of Coverage and other plan materials.

The following drugs will be removed from the formulary.

*****CLOSED FORMULARY*****
